First Task: ROS Installation

Part 1, installing on the VirtualBos – Ubuntu and then jetson nano

Name \ Fahad Mohammed Alnefaie
E-mail \ fh333rr@gmailcom

Whtsapp \ 0537001686

### Step 1. Install VirtualBox

1. Go to the link **https://www.virtualbox.org/wiki/Downloads** and click on Windows hosts

   VirtualBox-6.1.34a....exe
   2.0/104 MB, 3 mins left
2. After the .exe file installed, click on it, and press next >> next >> next >> yes >> install
3. After it's installed simply click finish

Step 2. Install Ubuntu

1. Go to the link **https://releases.ubuntu.com/20.04/** and click on "64-bit PC (AMD64) desktop image" to install the version 20.04

   ubuntu-20.04.4-de....iso
   0.2/3.1 GB, 1 hour left

2. After the .exe file installed, go to the VB and click new and fill on the following information

3. Then when this widow is open click install ubuntu

4. Then chose the English language and continue pressing next until the system installed

Step 3. Install ROS2 in Ubuntu

1. Open the terminal do the following
   - **Set Locale**

   - **Setup Sources**

```
zainab@zainab:~$ sudo apt update && sudo apt install curl gnupg2 lsb-release
```

```
zainab@zainab:~$ sudo curl -sSL https://raw.githubusercontent.com/ros/rosdistro/
master/ros.key  -o /usr/share/keyrings/ros-archive-keyring.gpg
```

```
zainab@zainab:~$ echo "deb [arch=$(dpkg --print-architecture) signed-by=/usr/sha
re/keyrings/ros-archive-keyring.gpg] http://packages.ros.org/ros2/ubuntu $(sourc
e /etc/os-release && echo $UBUNTU_CODENAME) main" | sudo tee /etc/apt/sources.li
st.d/ros2.list > /dev/null
```

- **Install ROS2 packages**
```
zainab@zainab:~$ sudo apt update
```

```
zainab@zainab:~$ sudo apt upgrade
```

```
zainab@zainab:~$ sudo apt install ros-foxy-desktop
```

- **Environment setup**
```
zainab@zainab:~$ source /opt/ros/foxy/setup.bash
```

```
zainab@zainab:~$ ros2 run
```

```
zainab@zainab:~$ gedit ~/.bashrc
```

```
119
120 source /opt/ros/foxy/setup.bash
121
```

```
zainab@zainab:~$ ros2 run
```

```
zainab@zainab:~$ sudo apt install -y python3-pip
```

```
zainab@zainab:~$ pip3 install -U argcomplete
```

Part 2, installing on Jetson nano

   Rewrite the same above commands but on jetson nano and after test it using the following command

- **ros2 topic list**
```
zainab@zainab:~$ ros2 topic list
/parameter_events
/rosout
```

and finally, ROS2 has been installed Successfully
